
one bearing
inner-race defect
one test rig
vibration record, 171 ms shown
windows, 50% overlap
training
calibration
held-out test
(a) Random window split
each row is one run;
its windows fall on both sides
(b) Split by run
train
train
train
test
all windows of a recording
stay on one side
(c) Cross-dataset transfer
source rig
train
train
target rig
calib.
test
no target label reaches training;
adaptation uses calib. only
